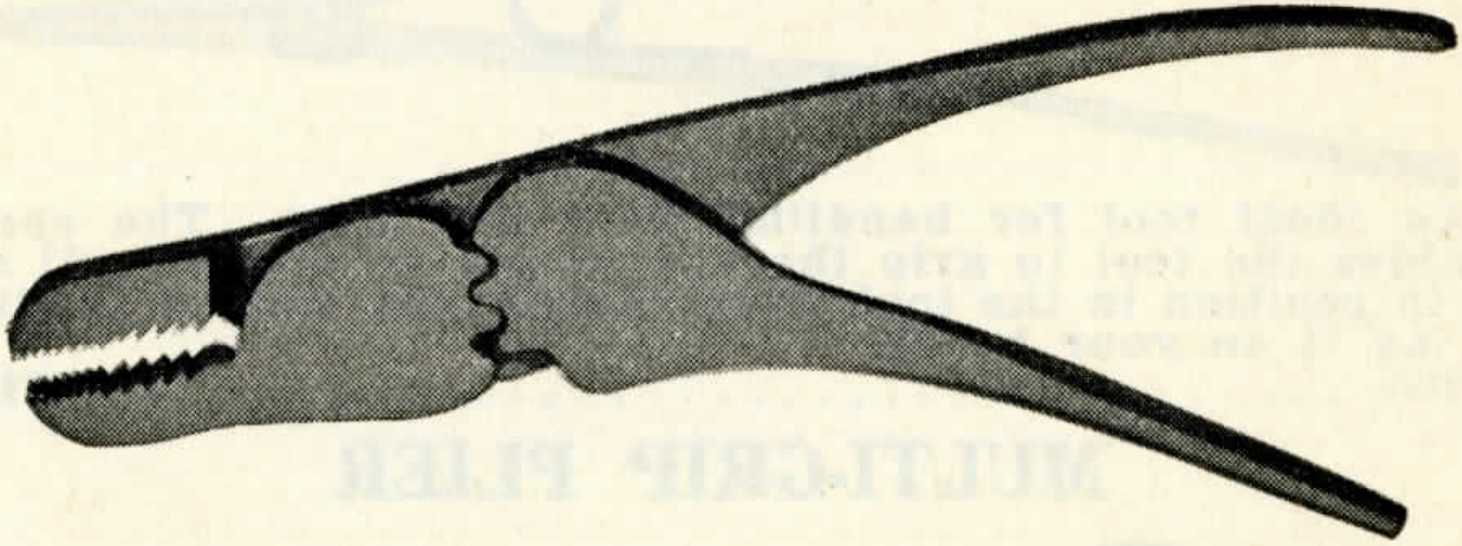
SUPER-GRIP PLIER



This new patented tool is an exceptional plier which holds all rounds from a pin up to one inch. The lower jaw is adjustable with a slip joint which permits the tool to handle a large variety of sizes. Teeth in the jaws run opposite to each other and this fact combined with its geared leverage gives a tremendous grip. It is a wonderful tool for stud bolts and brake rods and every mechanic should reserve a space in his tool kit for it.
